

SSFV Structural Steel Fabricators Association Victoria

Structural Steel Fabricators Association Victoria

Established in 1969 - united by the strength of steel

We are a group of steel fabricators conducting business in the building and construction industries primarily in Victoria but in many instances Australia wide.

Our Association represents around 70-75% of structural steel fabricators operating in Victoria.

We meet quarterly to network and discuss areas of common interest.

We are represented at the Australian Steel Institute, National Fabrication Forum and work with Work Safe Victoria on various committees and working parties to advance the safe use of steel.
